

JACOB MARY TAPERE

Full Stack Software Engineer

Cebu City · jacobmary.tapere007@gmail.com · +63 993 223 7994 · jacob-mary-tapere.vercel.app

Full Stack Software Engineer specializing in React.js and React Native, with backend experience in Node.js/Express, Go, and real-time systems using WebSockets. Experienced in building end-to-end web and mobile applications, integrating AI models, and working with both relational and NoSQL databases. Proven track record in technical leadership through capstone and freelance project delivery.

EXPERIENCE

Symph

Feb 2026 – May 2026

Full Stack Web / Mobile Developer Intern

- Developed and maintained full stack features across a Next.js frontend and Nest.js backend within an Nx smart monorepo architecture.
- Implemented a Send Direct Reset Password feature and developed a role-based access control system allowing authorized roles to accept shipment update requests, view version histories, and receive integrated notifications.
- Resolved PDF layout bugs and contributed UI fixes across the platform to improve document rendering consistency.
- Collaborated with cross-functional teams to deliver scalable, modular code following monorepo best practices for shared libraries and workspace configuration.

Freelance

Nov 2024 – June 2025

Full Stack Developer

- Designed and developed a full stack delivery platform web application, handling both frontend interfaces and backend integration.
- Converted UI/UX designs into a functional, responsive web experience connected to a live database.

PROJECTS

Flying Tiger Express: Mobile Logistics and Parcel Delivery Platform

<https://www.flyingtigers.express>

Next.js · NestJS · Supabase · Firebase · NX

- Developed and maintained REST APIs with NestJS and Next.js for a logistics and delivery platform, incorporating JWT authentication, input validation, role-based access control, and data integrity checks to secure API endpoints.
- Optimized database queries and contributed to authentication flows, improving backend reliability and data protection across the platform.
- Diagnosed and resolved multiple compounding issues with PDF invoice generation, correcting layout, formatting, and data rendering to produce accurate client-facing documents.
- Refactored existing codebase for improved maintainability and resolved UI bugs across the platform, including layout corrections on key frontend pages.
- Collaborated with the team to propose and implement feature improvements, contributing to both backend reliability and frontend user experience.

RubberTapAI: An AI Application for the Rubber Industry

rubbertapaiadmin.netlify.app

React.js + Vite · React Native Expo · Node.js / Express.js · Appwrite · Firebase

- Trained and deployed a computer vision model using Google Teachable Machine and TensorFlow to detect rubber tree diseases from images, integrating it into both a React Native Android app and a Node.js/Express backend for end-to-end disease diagnosis.
- Architected a hybrid AI inference system supporting both on-device and server-side processing, allowing the app to function offline and fall back to server analysis depending on connectivity.
- Built image capture and upload functionality within the mobile app, enabling users to either photograph rubber trees in real time or submit existing images for disease detection.

- Led the full development of the mobile Android platform using React Native and the backend server using Express.js, REST APIs, and WebSockets for real-time communication serving as the sole programmer across the entire system.

Pet Care Pro: All-In-One Multi-role Pet Services Platform

<https://pet-care-pro.vercel.app>

Next.js · Firebase

- Architected and developed an all-in-one multi-role pet services platform using Next.js and Firestore, delivering five separate role-based web applications for veterinarians, pet sitters, boarding facilities, a pet store, and funeral services each with tailored dashboards and workflows.
- Translated Figma UI/UX designs into fully functional interfaces, implementing real-time updates for appointments and bookings to keep all roles in sync across the platform.
- Sole developer responsible for the full development lifecycle from database design in Firestore to frontend implementation ensuring consistency, quality, and maintainability across all five portals.

ChutUpp: Real-time Secure Chat Application

<https://chut-upp.vercel.app>

React.js + Vite · Firebase Auth · PostgreSQL · Go · Websocket

- Sole developer responsible for the full development lifecycle from database design in PostgreSQL to frontend implementation ensuring consistency, quality, and maintainability across all five portals.

TECH STACK

Frontend	Next.js · React.js + Vite · Vue.js · React Native + Expo · Jetpack Compose
Architecture	MVC · Monolithic
Backend	NestJS · Go · Typescript · Kotlin · Node.js / Express · Javascript
Tools	Figma · Git · GitHub · Clickup
Backend	Firebase · Supabase · Appwrite · MongoDB · PostgreSQL · MySQL

EDUCATION

University of Cebu – Banilad Campus

Aug 2022 – Jun 2026

Bachelor of Science in Information Technology

CERTIFICATIONS & TRAINING

CCNA: Switching, Routing, and Wireless Essentials — Cisco Networking Academy Aug 2024 – May 2025

AWARDS & RECOGNITION

Innovate Cebu 2026

Semi-Finalist — Visayan Electric Co. track

UC CCS 11th ICT Congress

2nd Place — Networking Competition

Hack4Gov 2025 – Region 7

8th Placing Team
